

MHTM™ MicroDrive Access Manual

Access-Manual is the barrier of choice, should you wish to have a manual barrier to match your MHTM™ Microdrive automatic barriers. Available in boom lengths up to 20 Ft and in 4 standard colors: Orange (RAL 2000), White (RAL 9010), Dark Grey (similar to RAL 9007), and Light Grey (similar to RAL 9006).

Design and quality

MHTM MicroDrive barriers impress with sophisticated and enduring design. The modularly designed housing made of extruded aluminum profiles and a base frame made of stainless steel (both powder-coated) offers best protection against corrosion.

MicroBoom

The Microboom is the straight boom arm for the MHTM™ MicroDrive and comes equipped with a foam edge which offers best protection against damages and harm to people.
